DETAILED ACTION

This Office Action is in response to the Request for Continued Examination (RCE) dated 06/14/05. In reviewing of the IDS submitted with the RCE, the US patent number 6, 463,891 to Algrain et al. was found to read on claims 1-6, 9, 10, 27, 29, and 31. Therefore, the Examiner regretfully withdraws the allowability of the aforementioned claims.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-6, 9, 10, 27, 29, and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Algrain et al.

Algrain discloses a fan array fan section in an air-handling system (Figs. 1-3, 4A, 4B), comprising a plurality of fan units arranged in an array (Fig. 2); an air-handling compartment within which the fan array of fan units is positioned (Fig. 2); an array controller strategically turning the selective ones of the plurality of fans on and off (Fig. 3, 4A, 4B);

wherein the air-handling compartment has an airway path, the airway path being less than 72 inches (the airway path being between the Engine Coolant Core and the fans 10, 12 in Fig. 2); wherein the plurality of fan units are arranged in a true array configuration (Fig. 2); wherein the plurality comprises at least two vertically arranged fan units (Fig. 2);

wherein each of the plurality of fan units is positioned within a fan unit chamber (Fig. 2).

However, Algrain does not disclose the fan array fan section comprises at least six fan units as claimed.

It would have been obvious to a person having ordinary skill in the art at the time the invention was made, to make the fan array fan section of Algrain with at least 6 fan units to satisfy the cooling requirement of the Engine Coolant Core as taught by Algrain (col. 9, lines 47-53).

Allowable Subject Matter

- 3. Claims 32-47 are allowed. The claims are deemed to be a non-obvious improvement over the invention patented in Pat. No. 5,788,568. The improvement is an array controller for turning selective ones of the fan units on and off.
- 4. Claims 7, 8, 21, 23, and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

The prior art made of record but not relied upon is considered pertinent to applicant's disclosure and consists of 1 patent.

Noba (4,651,922) is cited to show a fan array having a controller.

Information Disclosure Statement

In the previous Office Action, only page 1 of the PTO form 1449 dated 03/22/04 was attached. The second page of that form 1449 is attached in this Office Action along with the IDS of 06/14/05.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Ninh Nguyen whose telephone number is (571) 272-4823. The examiner can be normally reached on Monday-Friday from 7:30 A.M. to 5:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Look, can be reached at (571) 272-4820. The fax number for this group is (571) 273-8300.
